DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-33 and 47-61, drawn to a method for surface estimation, classified in class 324, subclass 354.
- II. Claims 34-46, drawn to a method for designing a focused electromagnetic source, classified in class 367, subclass 14.
- III. Claims 62-80, drawn to a method for collecting electromagnetic data, classified in class 340, subclass 853.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed (ABbr—such as claim 1) does not require the particulars of the subcombination as claimed (Bsp, such claim 38). The subcombination has separate utility such as “method for designing an electromagnetic source in logging tool devices.” See MPEP 806.05(c)III.

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2)

that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed (ABbr—such as claim 1) does not require the particulars of the subcombination as claimed (Bsp, such as claim 64). The subcombination has separate utility such as “method for collecting an electromagnetic data” in logging tool industry. See MPEP 806.05(c)III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by (1) their different classification and (2) their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Attorney J. Paul Plummer on 01/24/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
